

MatriX

MatriX

The MatriX models are recognisable by their camp-fire design of logs. The fire effect of our MatriX fires is incredibly realistic at any flame height. Thanks to the various dimensions, models and options, the MatriX will meet extremely wide-ranging cosiness requirements.

Why opt for the MatriX:

- Plenty of choice in sizes and models; there is always a MatriX fire to suit your situation.
- With (optional) Symbio® ember bed lighting; for an even richer fire effect with an ember bed, even without the use of the flames,
- High flames with realistic ceramic logs in a traditional camp-fire design.
- 5 adjustable burners; with 2 settings for an extra deep and intense effect,
- Adjustable heat output; from maximum 10 to minimum 4 kW.
- Available in various sizes and as a front, 2 and 3-sided version, Room divider or See-through model.

MatriX Hybrid

Our hybrid MatriX ambient fires are electrically supported using LED lighting; comparable with hybrid cars. This low-energy light source has been applied to partially replace the gas flames and to enrich the glowing fire. This unique 'play' between gas and light, known as 'Hybrid Pro Lighting' (HPL) gives rich flames whose intensity and experience beats any standard gas-fired fireplace. What's more, this HPL module can reduce gas consumption, CO2 emissions and heat transfer by more than 50%.

Why opt for the MatriX Hybrid?

- Up to 50% less gas consumption; without sacrificing the natural flame effect,
- The (optional) Hybrid Pro Light module gives even richer flames; even at the lowest setting,
- Horizontal flame effect with equally distributed flames over the entire width of the fire,
- No less than 7 individual burners offer unequalled adjustment possibilities; always the perfect flames for any situation,
- Adjustable heat output from maximum 10 down to a mere 1.5 kW; therefore also ideal for modern, well insulated houses with relatively limited heat requirements,
- Available in various sizes and as a front, 2 and 3-sided version, Room divider or See-through model.

Matrix
LINEAR

Matrix Linear

Our Linear Fire models offer a lavish fire effect over almost the full width of the fire and that is true for every flame height. Even with a minimum heat output, the flames of this model look fabulous. There is a choice of three inset widths, each of them in three versions and with various interior decorations.

Why opt for the Matrix Linear?

- Extra wide and low gas fire; up to 130 cm of flames!
- Double row of individually adjustable burners; for more intensive flames and added heat output,
- Choice of luxury ceramic log set or white Carrara pebbles for an extra modern and luxurious look;
- Adjustable heat output; from maximum 10 to minimum 4 KW.
- Available in various sizes and as front, 2 and 3-sided models.

Built-in

Faber built-in gas fires are a statement in themselves. First and foremost because of a fabulously burning fire and the most beautiful finish with life-like decorative logs or modern pebbles. In addition because of the top-quality choice of materials that guarantee years of safe and problem-free enjoyment. Particularly when you operate the fire remotely with a control unit or from your own smartphone.

Faber gas fires are available in a surprising number of versions, dimensions and finishes so you can choose what is best suited to your taste and interior decoration. The Faber specialist is there for you throughout the entire process!

Did you find your favourite Faber fire? It will be built, set and tested by Faber, specifically for you, before we deliver it to the Faber specialist who will install it in your home.
